Techniques	Agile Development, Pair Programming, Test Driven Development

SOFTWARE ENGINEERING APPLICATIONS

Gamego (Professional e-Commerce Website) [Github Repo]

Back End Engineer - *Express, PostgreSQL, Cassandra, New Relic, Artillery.io, Loader.io, AWS*

- ▶ Deployed independent EC2 instance of Postgres with 10 million + entries and configured to allow connections from application
- ▶ Connected and deployed Docker images for both database and front-end using AWS ECR, ECS, and EC2
- ▶ Orchestrated and deployed an EC2 instance for both front and back end of application using DockerCompose
- ▶ Stress tested application: App server response time decreased from 1.87 ms to 1.23 ms with a 0% error rate and throughput of 6,000 rpm

Shmetsy (Professional e-Commerce Website) [Github Repo]

Full Stack Engineer - *Express, React, CSS Modules, Webpack, Babel, Docker, MySQL*

- ▶ Increased Google Page load speed score from 3 to 98 via image, text and build compression
- ▶ Built and deployed a containerized Node.js application image utilizing Docker and AWS CLI
- ▶ Streamlined Docker image build process by linking local application to RDS database instance
- ▶ Simplified proxy server deployment by converting application stylesheets to CSS Modules

DadJokes Unlimited (Daily Dad Jokes) [Github Repo]

Full Stack Engineer - *Express, React, React-Router, React Hooks, CSS Modules, Bootstrap, Webpack, Babel, MongoDB, Mongoose, node-cron, Passport.js*

- ▶ Secured application with passport.js oauth 2.0 google strategy, user persistence configured with MongoDB
- ▶ React Router and React Context with React Hooks used to manage login state and enable access to protected routes
- ▶ Icanhazdadjokes and Twilio API used to send node-cron scheduled jokes to subscribers' cellular devices
